

PROTECT YOUR PRIVACY & CONNECT WITH

Anyone. Anywhere. Anytime.

Ensure all your communications with colleagues and consumers are protected from the privacy compromising vulnerabilities of other platforms. SpaceCycles new SafeVchat is the leading secure video conferencing platform. With technologies such as the patented out-of-band authentication and keystroke encryption. No other competitor in the industry can match SafeVchat's signature 5-Level security control approach.

Secure Video Conferencing

Existing video conferencing solutions were not designed to protect people, or confidential data. Hackers are exploiting these conferences to steal intellectual property, employee data, financials, and more. SafeVchat protects all of this.

LEAD WITH SECURITY

Stop the Vulnerabilities

The current marketplace video conferencing solutions are inherently vulnerable to a myriad of attack vectors.
